

Scale Free Flight Brief 100 September 2025

Back in 2020 Doug Hunt initiated the newsletter Scale Free Flight Brief and thereafter from issue eleven I took on the task of keeping the Scale Free Flight community up to speed with news etc about the subject. I am pleased that we have now reached the magic number of 100 editions. I hope to continue sending these out as and when for as long as I am involved and competent enough to do so. Ask any 73-year-old what I mean by that.

Scale at the Free Flight Nationals.

In conjunction with the FFTC Scale Free Flight was able to hold two contests at the FF Nationals. We were blessed with very low to flat calm wind conditions. These contests were well contested by all. As usual a full report will be forthcoming in the Aeromodeller. Sculthorpe is a good site and well worth the visit. Any future contests held there will be in the Scale Free Flight calendar for 2026.

Scale Nationals

BMFA **2025 SCALE NATIONAL CHAMPIONSHIPS**
Radio Control - Control Line - Free Flight

F4C -15kg F4H -15kg
F4B FF1- SuperScale
Flying Only (Builder & ARTF)*
Saturday Night Social

12 - 14 September

BMFA National Centre - Buckminster NG33 5RW
Entry - <https://scale.bmfa.org/bmfa-scale-rc-nationals-2024-4035>
For more info contact Monz Lyons - bmfascalenationals@gmail.com

For those that wish to compete in the Scale Nationals time is running short to enter. Pre-entry is required and the closing date is Sunday 7th September.

The free flight contests, Superscale and Assisted Scale Free Flight will be run on Saturday 13th September. Static from 11.00 TBC and then flying from 5.00 when the RC flying finishes.

Further details will be sent out to contestants prior to the Nats.

Contact me for further details

I am still seeking a static judge. I do not expect a big entry, so will not be too onerous.

Flying Aces

Saturday 6th September Peterborough Flying Aces

Flying Aces Nationals at Ferry Meadows, Nene Park, Peterborough PE2 5UU.

For directions and contests see website.

10.00 to 16.15.

Contact: Andrew Green on 07853557085 or secretary@peterboroughmfc.org.

Parnall Elf

The structure is complete except for the unusual warren girder interplane struts. It is heavier than I would like, aren't they all. In the photo the model's wings are jiggged up so that I can work out length and build of the struts. Not difficult, just fiddly, but needing a good bit of think time. Table is a mess but I know where everything is!!!

Mike
